

Sustainability Training

www.sustainabilitytraining.africa

Our Vision

To unlock the potential of organisations across Africa to deliver long-term positive outcomes for nature, climate and people while making profits and exceeding respective program objectives

Our Mission

Sustainability Africa's mission is twofold: offer consultancy services to organisations, proposing new ways to respond to the challenges of a changing planet, while providing training on how to enhance sustainable development impact at organizational level

Our Goal

Our aim is to help organisations across Africa improve their sustainable impact by implementing the best sustainability integration strategies in their operational and business models

Greater demands for corporate accountability, transparency, sustainable consumption, and ethical practices mean organisations need to be up to date when it comes to best practices in corporate sustainability and sustainable impact

About Sustainability Africa

Whether you are developing your skills or consolidating them, Sustainability Africa offers a range of expert-led, interactive sustainability integration and sustainable development impact training services

Since our establishment in 2015, our capacity enhancement projects are delivered by experts in their field and enable our clients and partners to quickly upskill their teams. All training can be adapted to be delivered in-house or digitally

Our Expertise

EIGHT Key Industries

- Tourism & hospitality
- Agribusiness
- Public sector
- Financial services
- Education
- Energy & Utilities
- Built Environment
- Labour & employment

FOUR Comprehensive Steps

- > **ENTRY-** Preliminary diagnosis to establish the situation and needs
- > **PROPOSAL-** Presentation of a proposal including methodology and timetable
- > **ANALYSIS & ASSESSMENTS-** Beginning of the study and carrying out of the consulting mission as validated
- > **DELIVERY-** Evaluation of findings, final report and presentation of results.

Sustainability, Innovation, and Impact are our priorities

Why Work with Us?

Plurality & internationality

Our trainers & consultants come from diverse levels of studies, from bachelor to master, and academic focus such as management, sustainability, consulting, entrepreneurship, innovation, marketing, and finance

We bring together over 70 years of cumulative experience in impact and sustainability training across different countries in Africa and Asia

Expertise you can trust

Our trainers & consultants come from the best Africa can offer and are equipped with contemporary technical, training and presentation skills to deliver impactful sessions for your teams

Commitment to sustainability

Gaining knowledge and understanding is the first step of any sustainability journey! So, the fact that you are here, we congratulate you. We work with all those committed to addressing the social and environmental challenges in the African continent and beyond. We are eager to forge partnerships with those seeking to create a genuine and positive change

Sustainability Africa in action

Manrik Group Case Study

Manrik Group is a Kenyan company whose goal is to provide customers with high-quality goods and services in the tourism & hospitality, agribusiness, property development & maintenance while minimizing the impact of its operations on people and the environment

Sustainability Africa delivered an exhaustive supply chain assessment evaluating all the processes involved in each subsidiary and the opportunities for sustainability integration and potential real benefits for the business operations. Our trainers then designed and delivered a tailored training to the management team on how to adjust business & operational models to minimize risks while leveraging the sustainable advantages

Capacity Building for Sustainable Development
